SUMMARY

DevOps Engineer with 2+ years of experience automating cloud infrastructure across two concurrent production products using Python, Golang, and Infrastructure as Code (Terraform, Ansible, CloudFormation). Delivered CI/CD pipelines, Kubernetes (EKS) orchestration, and GitOps workflows that cut deployment times and reduced operational overhead. Certified AWS practitioner with hands-on expertise in container orchestration, full-stack observability, cost optimization, and cloud migrations from on-premises to AWS. Experienced collaborating across backend, frontend, and mobile teams using AI-assisted engineering workflows.

TECHNICAL SKILLS

Cloud Platforms: AWS (EKS, EC2, S3, RDS, Lambda, SQS, CloudFront, Route 53, KMS, CodePipeline), Azure, GCP

Infrastructure as Code: Terraform, Ansible, AWS CloudFormation

Containerization & Orchestration: Docker, Kubernetes (EKS), Helm, ArgoCD, Karpenter, KEDA

CI/CD & Automation: GitHub Actions, Jenkins, Bitbucket Pipelines, Bitrise, AWS CodePipeline

Monitoring & Logging: Prometheus, Grafana, AWS CloudWatch, ELK Stack, Graylog, Loki, OpenSearch

Programming & Scripting: Python, Golang, Bash, Shell

Databases & Caching: MySQL, MongoDB, PostgreSQL, Redis, AWS RDS (SQL Server)

Networking & Security: VPC, ALB/NLB, DNS (Route 53, Cloudflare), SSL/TLS, IAM, KMS, Nginx, Traefik, Cert-Manager

Messaging & Queuing: Amazon SQS, RabbitMQ

GenAI & Developer Tools: Claude, Gemini, Factory.ai, Augment, Warp Terminal

EXPERIENCE

DevOps Engineer

Wenable Technologies Pvt. Ltd

November 2023 – Present

Hyderabad, Telangana, India

- Spearheaded cloud infrastructure, CI/CD, and platform engineering for 2 concurrent products — **WeGuard** (enterprise mobility) and **Apollo ELD** (fleet compliance) — supporting 4 environments (dev, QA, staging, production) simultaneously.
- **Golang Backend Services:** Built and maintained Golang microservices including the WeShield security agent service; wrote automation scripts in Golang and Python for infrastructure provisioning, certificate monitoring, and operational maintenance tasks.
- **Cloud & Kubernetes:** Architected AWS infrastructure using Terraform and CloudFormation across 7+ EKS clusters hosting containerized microservices in Java, Golang, Python, and .NET; deployed via Helm charts and ArgoCD, GitOps pipelines.
- **CI/CD & Release Automation:** Engineered and maintained end-to-end CI/CD pipelines with GitHub Actions, Jenkins, Bitbucket Pipelines, and Bitrise, reducing manual deployment effort by 60%; automated provisioning, certificate monitoring, and maintenance using Bash, Python, and Golang scripts.
- **Cloud Migration & Modernization:** Executed a zero-downtime SCM migration from Bitbucket to GitHub covering 180+ repositories, all branch policies, and CI/CD workflows; containerized legacy on-premises services on AWS EKS, cutting infrastructure overhead by 40%.
- **Observability & Incident Response:** Implemented full-stack observability using Prometheus, Grafana, CloudWatch, Loki, Graylog, and OpenSearch; reduced mean time to resolution (MTTR) for production incidents by establishing structured root cause analysis workflows.
- **Security & Networking:** Automated SSL/TLS certificate lifecycle with cert-manager across 10+ domains; configured DNS routing via Route 53 and Cloudflare; enforced IAM least-privilege policies and KMS encryption for all sensitive data at rest and in transit.
- **Database Administration & Cost Optimization:** Administered 5+ database systems (MySQL, MongoDB, PostgreSQL, Redis, SQL Server) on AWS RDS; reduced monthly cloud spend by 30% through Karpenter autoscaling, scheduled instance shutdowns, and instance right-sizing.
- **Frontend & Web Deployments:** Automated frontend deployments to AWS S3 and CloudFront with CI/CD-triggered cache invalidation, decreasing release cycle time for frontend teams to under 10 minutes per deployment.
- **GenAI Integration:** Integrated AI-powered tools (Claude, Gemini, Factory.ai) into engineering workflows, accelerating code review, documentation, and troubleshooting — improving team velocity by an estimated 25%.

PROJECTS

WeGuard – Enterprise Mobility Management (EMM) Platform | *AWS, EKS, ArgoCD, Helm, Karpenter, KEDA, Graylog, SQS*

- Orchestrated 3+ EKS clusters hosting microservices across Java, Golang, Python, and .NET for a Google Gold Partner Android Enterprise Recommended EMM platform serving enterprise-scale device fleets.
- Engineered the Golang-based WeShield security service handling device policy enforcement and compliance checks at the infrastructure level.
- Executed zero-downtime SCM migration from Bitbucket to GitHub, transitioning 180+ repositories, branch policies, and CI/CD workflows with no disruption to 15+ developers.
- Designed GitOps pipelines with ArgoCD and Helm, enabling zero-downtime blue/green deployments across all 4 environments.
- Configured Karpenter-driven node autoscaling, reducing compute costs by 25% through on-demand right-sizing and fault-tolerant provisioning.
- Administered Graylog clusters processing 1M+ log events per day across streams, pipelines, extractors, and custom alert conditions.
- Transitioned message queuing from RabbitMQ to Amazon SQS and applied KEDA-based autoscaling, improving event-driven consumer throughput by 35%.
- Provisioned self-hosted Tolgee localization infrastructure, enabling i18n workflows for 5+ product locales.
- Maintained MongoDB, PostgreSQL, and Redis with automated backup/restore procedures; achieved a recovery time objective (RTO) of under 30 minutes.

Apollo ELD – Fleet Compliance Platform | *AWS, EKS, GitHub Actions, Bitrise, Terraform, Lambda, RDS*

- Migrated an entire legacy on-premises application stack to AWS EKS, containerizing 30+ services of linux and windows os with Docker and reducing infrastructure provisioning time from days to under 2 hours using Terraform modules.
- Deployed self-hosted Nominatim geocoding service on AWS, handling 500K+ location queries per day with optimized ingress routing and resource allocation.
- Constructed CI/CD pipelines with GitHub Actions (backend) and Bitrise (iOS/Android), cutting mobile build and release time by 50%.
- Deployed Lambda-based scheduled batch workflows processing fleet compliance data for 1,000+ trucks across the USA, alongside EKS-hosted microservices.
- Administered SQL Server and Redis on AWS RDS with daily automated backups, query tuning, and AES-256 encryption at rest.
- Standardized infrastructure provisioning across dev, staging, QA, and production using reusable Terraform modules, reducing environment spin-up time by 70%.
- Integrated AI-driven pull request review tooling into GitHub Actions, detecting security vulnerabilities and code defects before merging across 5+ active repositories.

EDUCATION

Vignana Bharathi Institute of Technology

Bachelor of Technology in Information Technology

Hyderabad, Telangana, India

August 2019 – June 2023

CERTIFICATIONS

AWS Certified Cloud Practitioner – Foundational AWS cloud concepts, core services, and cloud economics

AWS Cloud Architecture Certification – Designing and implementing scalable, highly available infrastructure on AWS

Cisco CCNA Certification – Networking fundamentals, IP connectivity, routing, switching, and security essentials
