Summary

DevOps and Platform Engineer with 3 years of experience, including a three-month DevOps internship followed by full-time employment, supporting highly available enterprise products across on-premises and AWS environments. Hands-on expertise in Linux administration, AWS Systems Manager, Kubernetes, Docker, CI/CD, and production incident response, with working knowledge of Ansible. Experienced in building release automation, diagnosing distributed systems, and using controlled AI-assisted operations workflows to improve detection, root cause analysis, and remediation.

Technical Skills

Cloud: AWS (VPC, IAM, EC2, EKS, CloudWatch, S3, RDS, Route 53, Lambda, SQS, KMS, ALB/NLB); Azure and GCP (Working Knowledge)
Systems & Configuration: Linux, AWS Systems Manager, Ansible
Infrastructure as Code: Terraform, CloudFormation, Helm
Containers & Platforms: Docker, Kubernetes, EKS, ECS, ArgoCD, Karpenter, KEDA, Nginx, Traefik, Cert-Manager
CI/CD & Automation: GitHub Actions, Jenkins, Bitbucket Pipelines, Bitrise, AWS CodePipeline, GitOps
Programming: Python, Golang, Bash, Shell
Observability & Operations: Prometheus, Grafana, CloudWatch, Loki, Graylog, OpenSearch, Monitoring, Alerting, Dashboards, RCA
Distributed Systems: REST APIs, Microservices, Retries, Dead-Letter Queues, Idempotency, Failure Isolation, API Troubleshooting
Data & Messaging: MySQL, MongoDB, PostgreSQL, Redis, SQL Server, Amazon SQS, RabbitMQ
AI-Assisted Operations: LLMs, CLI AI Agents, MCP, Skills-Based Agents, Approved Remediation Workflows

Experience

Wenable Technologies Pvt. Ltd

Hyderabad, Telangana, India

DevOps Engineer

November 2023 – Present

- **Engineering Operations:** Manage cloud infrastructure, CI/CD, and release tooling for WeGuard and Apollo ELD across development, QA, staging, and production, partnering with backend, frontend, mobile, and infrastructure teams.
- **EKS Node Automation:** Execute scheduled EKS version upgrades using Terraform and automate node bootstrap and configuration changes through AWS Systems Manager and Bitbucket Pipelines.
- **Cloud & Kubernetes:** Provision AWS infrastructure with Terraform and CloudFormation across multiple EKS clusters; operate Docker workloads and Java, Golang, Python, and .NET services using Helm and ArgoCD.
- **CI/CD & Automation:** Build and maintain release pipelines using GitHub Actions, Jenkins, Bitbucket Pipelines, and Bitrise; automate provisioning, certificate monitoring, and operational maintenance with Python, Golang, and Bash.
- **Packer & Golden Images:** Developing a GitHub Actions pipeline for WeGuard that builds versioned, hardened AWS golden AMIs with Packer, validates images, and prepares approved machine images for repeatable deployments.
- **AI-Assisted Operations:** Use CLI-based AI agents with purpose-built skills and MCP integrations for Kubernetes and AWS to collect logs, events, and metrics, perform LLM-assisted root cause analysis, and recommend or execute engineer-approved remediation while retaining human control.
- **Monitoring & Cost Optimization:** Monitor production health using Prometheus, Grafana, and CloudWatch, tune alert thresholds, investigate incidents, and optimize infrastructure costs through usage analysis and right-sizing.
- **Distributed Systems:** Troubleshoot APIs and service dependencies across microservices; implement retries with backoff, SQS dead-letter queues, idempotent consumers, and failure isolation to improve event-processing resilience.
- **Incident Response & Observability:** Triage production and security incidents using Prometheus, Grafana, CloudWatch, Loki, Graylog, and OpenSearch; conduct root cause analysis and coordinate corrective actions with development and operations teams.
- **Migrations & Security:** Led Bitbucket-to-GitHub SCM migration with no developer disruption and modernized legacy on-premises workloads on AWS EKS; enforce least-privilege IAM, KMS encryption, TLS lifecycle management, and secure ingress routing.
- **Capacity & Cost Optimization:** Improve platform capacity and performance through Karpenter autoscaling, KEDA event-driven scaling, scheduled shutdowns, and instance right-sizing across production and non-production environments.

Wenable Technologies Pvt. Ltd

Hyderabad, Telangana, India

DevOps Engineer Intern

August 2023 – November 2023

- Supported Linux, AWS, Docker, Kubernetes, and CI/CD operations before promotion to full-time DevOps Engineer after three months.

Selected Projects

WeGuard — Enterprise Mobility Management Platform

AWS, EKS, ArgoCD, GitHub Actions, SQS, KEDA, Packer

- Operate multiple EKS clusters hosting enterprise microservices and GitOps releases with ArgoCD and Helm across isolated environments.
- Migrated messaging workloads from RabbitMQ to Amazon SQS, configured dead-letter queues and retry policies, and used KEDA to scale consumers from queue depth.
- Administer Graylog streams, pipelines, extractors, and alerts; maintain MongoDB, PostgreSQL, and Redis backup, restore, and caching procedures.

Apollo ELD — Fleet Compliance Platform

AWS, EKS, Terraform, GitHub Actions, RDS

- Migrated a legacy on-premises application stack to AWS, containerized services with Docker, and standardized EKS environments through reusable Terraform modules.
- Built GitHub Actions and Bitrise pipelines, deployed Lambda workloads alongside EKS services, and operated SQL Server and Redis on RDS with backups, tuning, and encryption.
- Deployed and optimized a self-hosted Nominatim geocoding service on AWS, including data imports, Linux resource tuning, and ingress configuration.

Education

Vignana Bharathi Institute of Technology

Bachelor of Technology in Information Technology

Hyderabad, Telangana, India

August 2019 – June 2023

Certifications

AWS Certified Cloud Practitioner | AWS Cloud Architecture Certification | Cisco CCNA Certification
