Summary

DevOps Engineer with 2+ years of hands-on experience automating cloud infrastructure through Python, Go, and IaC (Terraform, Ansible, CloudFormation) across two concurrent production products. Designed and maintained CI/CD pipelines, managed multi-environment release promotion workflows, and led on-prem to AWS cloud migrations that significantly reduced deployment times and operational overhead. Skilled in container orchestration (Docker, Kubernetes/EKS), GitOps (ArgoCD, Helm), and full-stack observability (Prometheus, Grafana, ELK Stack, Graylog). Consistent track record of reducing cloud costs through autoscaling, right-sizing, and governance policies. Leverages AI tooling (Claude, Gemini) to enhance development efficiency and accelerate day-to-day engineering workflows.

Technical Skills

- **Cloud Platforms:** AWS, Azure, GCP
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation
- **Containerization & Orchestration:** Docker, Kubernetes (EKS), Helm, ArgoCD, Karpenter, KEDA
- **CI/CD & Automation:** Jenkins, GitHub Actions, Bitbucket Pipelines, Bitrise, AWS CodePipeline
- **Monitoring & Logging:** AWS CloudWatch, Prometheus, Grafana, ELK Stack, Graylog, Loki
- **Programming & Scripting:** Bash, Python, Golang, Shell
- **Databases & Caching:** MySQL, MongoDB, PostgreSQL, Redis, RDS (SQL Server)
- **Messaging & Queuing:** Amazon SQS, RabbitMQ
- **Networking & Security:** VPC, ALB/NLB, DNS, SSL/TLS, IAM, KMS, Nginx, Traefik, Cert Manager
- **GenAI Tools:** Factory.ai, Augment, Claude, Gemini, Warp Terminal

Professional Experience

Wenable Technologies Pvt. Ltd <i>DevOps Engineer</i>	<i>Hyderabad, Telangana, India</i> <i>11/2023 - Present</i>
• <i>Managing cloud infrastructure, CI/CD, and platform engineering for two concurrent products — WeGuard (enterprise mobility) and Apollo ELD (fleet management) — delivering reliable, efficient, and scalable cloud solutions for developers and clients alike.</i> • Cloud & Kubernetes: Engineered AWS infrastructure using Terraform and CloudFormation across multiple EKS clusters hosting containerized services. Operated multi-language platforms (Java, Golang, Python, .NET) with Helm and ArgoCD for GitOps-driven deployments. • CI/CD & Release Management: Built and maintained CI/CD pipelines using GitHub Actions, Jenkins, Bitbucket Pipelines, and Bitrise (mobile). Managed multi-environment release promotion workflows across dev, QA, staging, and production. Automated provisioning, certificate monitoring, and maintenance tasks with Bash, Python, and Golang scripts. • Migrations & Modernization: Led SCM migration from Bitbucket to GitHub with zero developer disruption. Migrated legacy on-prem architectures to cloud-provisioned, containerized deployments on AWS EKS — modernizing the entire delivery workflow. • Monitoring & Incident Response: Established full observability with Prometheus, Grafana, CloudWatch, and centralized logging (Loki, Graylog, OpenSearch). Responded to production incidents with root cause analysis and cross-team debugging. • Security & Networking: Managed SSL/TLS lifecycle with cert-manager, DNS via Route 53 and Cloudflare, and ingress routing through Nginx, Traefik, and AWS ALB/NLB. Enforced IAM least-privilege policies and KMS encryption. • Database & Cost Optimization: Administered MySQL, MongoDB, PostgreSQL, Redis, and SQL Server on RDS. Reduced cloud spend through Karpenter autoscaling, scheduled shutdowns, and instance right-sizing. Deployed Lambda-based scheduled batch workflows and hybrid serverless architectures alongside EKS services. • Frontend & Web Deployments: Automated frontend deployments to AWS S3 and CloudFront with CI/CD-triggered cache invalidation and Route 53 DNS routing. Provisioned and managed containerized web applications within EKS alongside backend microservices. • Collaboration & GenAI: Provided DevOps support across backend, frontend, and mobile teams. Leveraged AI tools to accelerate troubleshooting, documentation, and code review workflows — improving overall team delivery speed.	

Projects

WeGuard — EMM Platform <i>Android Enterprise Recommended EMM platform (Google Gold Partner) for managing and securing large Android device fleets at enterprise scale.</i>	<i>Enterprise Mobility</i>
• EKS & Microservices: Managed multiple EKS clusters hosting microservices across Java, Golang, Python, and .NET stacks. • SCM Migration: Led migration from Bitbucket to GitHub — transitioning all repos, branch policies, and CI/CD workflows with zero downtime. • GitOps: Architected GitOps pipelines with ArgoCD and Helm for zero-downtime deployments across environments. • Autoscaling: Configured Karpenter-driven autoscaling with Nops for cost-efficient node provisioning and fault tolerance.	

- **Log Management:** Administered Graylog clusters for centralized log aggregation — streams, pipelines, extractors, and alert conditions.
- **Messaging Migration:** Migrated message queuing from RabbitMQ to Amazon SQS and implemented KEDA-based autoscaling for event-driven consumer scaling.
- **Tolgee:** Set up infrastructure for Tolgee (self-hosted localization platform) — enabling i18n workflows for the team.
- **Microservices Architecture:** Segregated API and consumer layers for microservices with independent scaling policies.
- **Databases:** Maintained MongoDB, PostgreSQL, and Redis with backup/restore procedures and caching strategies.
- **Frontend Deployments:** Automated frontend deployments to AWS S3 and CloudFront with CI/CD-driven cache invalidation, and managed containerized web applications on EKS.

Apollo ELD — Fleet Compliance Platform

Fleet Management

Electronic Logging Device solution for fleet safety, regulatory compliance, and operational reliability — serving trucking businesses across the USA.

- **Cloud Migration:** Migrated legacy on-prem workloads to AWS, containerized the full application stack with Docker, and transitioned deployments to EKS.
- **Nominatim:** Deployed Nominatim as a self-hosted geocoding service on AWS for location-based features — handling data imports, resource optimization, and ingress configuration.
- **CI/CD & Mobile:** Built CI/CD pipelines using GitHub Actions for backend services and Bitrise for iOS/Android mobile builds.
- **Serverless:** Deployed Lambda-based scheduled batch workflows and hybrid serverless architectures alongside EKS-hosted services.
- **Database:** Administered SQL Server and Redis on AWS RDS with scheduled backups, query tuning, and encryption.
- **Environment Provisioning:** Provisioned and maintained isolated environments (dev, staging, QA, production) with consistent Terraform modules.
- **AI Integration:** Integrated AI-driven PR review tooling into GitHub Actions to detect bugs and vulnerabilities before merging.

Education

Vignana Bharathi Institute of Technology
Bachelor of Technology in Information Technology

Hyderabad, Telangana, India
08/2019 - 06/2023

Certifications

- **AWS Certified Cloud Practitioner:** Foundational AWS cloud concepts and core services.
- **AWS Cloud Architecture Certification:** Designing and implementing scalable infrastructure on AWS.
- **Cisco CCNA Certification:** Networking fundamentals, IP connectivity, and security essentials.
