Summary

DevOps Engineer with 2+ years of experience managing Kubernetes clusters with microservices, and CI/CD pipelines serving developers across two concurrent products. Led on-prem to cloud migrations on AWS, modernized legacy stacks with Docker and Kubernetes, and drove SCM migration from Bitbucket to GitHub. Skilled in Terraform, ArgoCD, Prometheus, and Grafana with a track record of reducing deployment times and optimizing cloud costs through autoscaling and right-sizing.

Technical Skills

- **Cloud Platforms:** AWS, Azure, GCP
- **Infrastructure as Code:** Terraform, Ansible, CloudFormation, Packer
- **Containerization & Orchestration:** Docker, Kubernetes (EKS), Helm, ArgoCD, Karpenter
- **CI/CD & Automation:** Jenkins, GitHub Actions, Bitbucket Pipelines, Bitrise, AWS CodePipeline
- **Monitoring & Logging:** AWS CloudWatch, Prometheus, Grafana, ELK Stack, Graylog, Loki
- **Programming & Scripting:** Bash, Python, Golang, Shell
- **Databases & Caching:** MySQL, MongoDB, Redis, RDS (SQL Server)
- **Networking & Security:** VPC, ALB/NLB, DNS, SSL/TLS, IAM, KMS, Nginx, Cert Manager
- **GenAI Tools:** Factory.ai, Augment, Claude, Gemini, Warp Terminal

Professional Experience

AssuredTechmatics (formerly Assured Tracking Inc)

DevOps Engineer

USA- remote

04/2024 - Present

- **Apollo ELD** - Electronic Logging Device solution for fleet safety, regulatory compliance, and operational reliability for trucking businesses.
- **Cloud Migration & Modernization:** Migrated legacy on-prem workloads to AWS, containerized the application stack with Docker, and transitioned deployments to Amazon EKS with Helm-based releases and zero-downtime rollbacks - reducing deployment time by 50% and improving scalability across environments.
- **Cloud Infrastructure:** Provisioned and operated AWS infrastructure across Linux and Windows servers using Terraform and modular CloudFormation templates, managing services in production.
- **CI/CD & Mobile Builds:** Built CI/CD pipelines using GitHub Actions for backend services and Bitrise for Android/iOS builds, enabling faster release cycles for developers.
- **Monitoring & Incident Response:** Established full observability stack with Prometheus, Grafana, and centralized logging (Loki, Graylog), reducing mean time to resolution for production incidents.
- **Security, Database & Compliance:** Administered SQL Server on AWS RDS with scheduled backups. Oversaw SSL/TLS, DNS (Route 53), IAM least-privilege policies, and KMS encryption.
- **Serverless & Cost Optimization:** Deployed hybrid architecture with AWS Lambda alongside EKS-hosted services. Reduced AWS spend by 25% through autoscaling, scheduled non-prod shutdowns, and instance right-sizing.

Wenable Technologies Pvt. Ltd

DevOps Engineer

Hyderabad, Telangana, India

11/2023 - Present

- **WeGuard** - Android Enterprise Recommended EMM platform (Google Gold Partner) for managing and securing large Android device fleets at enterprise scale.
- **Cloud Infrastructure & IaC:** Engineered AWS infrastructure using Terraform and CloudFormation, standardized AMI builds with Packer across 7+ Kubernetes (EKS) clusters hosting 20+ containerized services.
- **Kubernetes & Platform Engineering:** Architected and operated EKS clusters for multi-language services (Java, Golang, Python, .NET). Applied Helm charts and ArgoCD for GitOps-driven, zero-downtime deployments.
- **SCM Migration:** Led the complete migration from Bitbucket to GitHub - transitioning all repositories, branch policies, and CI/CD workflows from Bitbucket Pipelines to GitHub Actions with zero disruption to 15+ developers.
- **CI/CD & Build Automation:** Designed pipelines using Bitbucket Pipelines, Dockerfiles, and Bitrise for mobile builds. Integrated with ArgoCD and Jenkins for continuous delivery.
- **Autoscaling & Resilience:** Configured Karpenter-driven autoscaling with Nops for resource efficiency. Supported disaster recovery planning and HA deployment patterns for production services.
- **Monitoring & Observability:** Established monitoring using AWS CloudWatch, Prometheus, and Grafana; centralized logs with Graylog, Loki, and OpenSearch for faster incident triage.
- **Security, DNS & Networking:** Systematized SSL/TLS lifecycle with cert-manager, directed DNS via Route 53 and Cloudflare, configured Nginx Ingress Controllers and AWS ALB/NLB for secure ingress and traffic routing.
- **Database & Scripting:** Maintained MySQL, MongoDB, and Redis caching; authored scripts in Bash, Python, and Golang for provisioning, certificate monitoring, and maintenance tasks.
- **GenAI Integration:** Leveraged AI tools for pipeline generation, log debugging, and documentation - reducing setup time and accelerating delivery cycles.

Education

Vignana Bharathi Institute of Technology

Bachelor of Technology in Information Technology

Hyderabad, Telangana, India

08/2019 - 06/2023

Certifications

- **AWS Certified Cloud Practitioner:** Foundational AWS cloud concepts and core services.
- **AWS Cloud Architecture Certification:** Designing and implementing scalable infrastructure on AWS.
- **Cisco CCNA Certification:** Networking fundamentals, IP connectivity, and security essentials.
